LIGHTING IN THE CHURCH: We are almost finished with the lighting project in the Church. Once one more light is delivered and installed we will make adjustments to the various light settings and placements of the lights. There are three large lights attached to the Cupula that come on at night that will take awhile to get installed however these do not effect our lighting in the Church for worship. Although this was a very expensive project, it was very necessary to change the lights to LED as well as the lighting system. We were reaching the point where it was difficult to find replacements for the bulbs in the Church and the lighting system that was originally installed in 1998 was run on “floppy disks” so we were definitely on borrowed time. Thanks for your patience. As many of you know, the best laid plans in renovations do not always work out as planned!
